WORK EXPERIENCE

Software Engineer
11/2023 – Present
Start Matter

- Chatbot Development: Led the design, development, and deployment of a robust chatbot.
- Improved software performance by identifying and resolving bottlenecks in the code, resulting in a 80% increase in system performance and a 90% reduction in response times.
- Built databases and table structures for web applications.
- Integrated third-party tools and components into applications.

Software Engineer
05/2021 – 05/2023
iTechArt Group

- Implemented secure authentication and authorization solutions, ensuring the protection of sensitive customer data and reducing the risk of security breaches.
- Updated old code bases to modern development standards, improving functionality, resulting in a 50% reduction in deployment time and a 40% reduction in deployment-related errors.
- Troubleshot and resolved bugs and issues, resulting in a 15% reduction in customer complaints.

Junior Software Engineer
09/2019 – 05/2021
Aibion Technologies

- Developed and maintained RESTful web services, improving the efficiency and flexibility of the application and reducing the number of customer complaints.
- Developed automated testing platforms and unit tests, reducing testing time by 50% and increasing test coverage by 30%.

SUMMARY

Professional Python backend developer with 5 years of experience, demonstrating a strong track record of developing and maintaining robust, scalable, and secure web applications. Proficient in popular Python web frameworks, with a deep understanding of object-oriented programming and data structures. Well-versed in SQL and NoSQL databases, as well as cloud technologies such as GCP and AWS. Excellent communicator and team player, capable of collaborating effectively with other developers to deliver high-quality products on time.

SKILLS & COMPETENCIES

- Python
- Object-Oriented Design
- RESTful API Design
- Design Patterns
- Microservices Architecture
- Unit Testing
- Git
- SQL/NoSQL
- Docker/Kubernetes
- Payment Gateways
- Monitoring & Alerting Systems
- AWS, GCP
- Cross-Team Collaboration
- Performance Benchmarking
- Database Design
- Problem-solving
- Adaptability
- Collaboration
